REVISION HISTORY SHEET 6

Full or partial reproduction, duplication, transfer to third persons and use without written consent of JSC "VO "Safety" is prohibited.

1 Scope

1.1 The present Policy in the field of environmental management (hereinafter referred to as the Policy) determines the stance of the top management of Joint Stock Company "VO "Safety" (hereinafter as the Company) in the field of environmental safety and environmental protection.

1.2 The present Policy is an integrated management system (hereinafter referred to as the IMS) document and it applies to the activities of structural subdivisions, branches and officials within the frames of the effective IMS.

1.3 The present Policy is developed with due regard to the requirements of ISO 14001, other documents of the Company's IMS and it is consistent with the recommendations of the International Atomic Energy Agency (IAEA).

1.4 The responsibility for the organization of the document development and approval by the JSC "VO 'Safety" Board of Directors lies with the Director General of the Company.

1.5 The Environmental Management Policy is subject to revision, correction and improvement in case of changes in the Company's development priorities and conditions. The Quality Division of the Quality Management Department shall be held responsible for formal execution, storage and introduction of changes hereto.

Full or partial reproduction, duplication, transfer to third persons and use without written consent of JSC "VO "Safety" is prohibited.

2 Environmental Management Policy

Joint Stock Company "VO "Safety" (hereinafter referred to as the Company) is implementing the activities related to scientific and engineering support of state regulation of safety in the atomic energy use, as well as development and improvement of regulatory and legal framework in the atomic energy use and other activities aimed at improvement of state regulation of safety in the atomic energy use. Meantime it realizes that the Company's activities may lead to negative impact on the environment and health of personnel and public. Therefore, assurance of environment safety and reduction of environmental effects to the lowest possible and reasonably achievable level is one of the highest priorities of the Company.

The goal of this Policy of the Company is ensuring and maintaining the level of environmental safety in the Company's activities, in which the short term and the long term impact on the environment ensures the preservation of natural systems, maintaining their integrity and life-supporting functions.

The main principle of the Company's activities is ensuring compliance with legal and other regulatory requirements and standards, including international ones, in the field of environmental safety and environmental protection, and strict compliance by each employee with the standards and regulations in the field of environmental protection.

To achieve the goal and implement the principles of environmental activities, the Company's management assumes the following obligations:

- To meet the requirements of the RF legislation and international acts in the field of environmental protection.
- To ensure interaction and coordination of the Company's environmental activities with the state authorities of the Russian Federation and local authorities;
- To provide economically acceptable reduction of specific indicators of waste generation and other types of negative impact;
- To ensure permanent readiness for the prevention, localization and elimination of consequences of natural and man-induced emergencies;
- To reveal, identify, systematize and evaluate possible negative environmental aspects at all the stages of implementation of activities in order to prevent accidents and reduce environmental risks to the lowest possible and practically achievable level;
- To provide the necessary resources, including personnel, finance, technology, equipment, and working hours for the environmental safety and environmental protection activities;
- To ensure the effectiveness of the environmental management system based on the requirements of ISO 14001 ensuring its continuous improvement and efficient functioning;
- To ensure transparency and accessibility of information about the Company's environmental activities;
- To deepen cooperation with international organizations and use foreign experience in solving environmental problems.

The Head of the Company undertakes the implementation of this Policy and will make every effort to fulfill the obligations undertaken.

Director General V. Tikhonov
