REVISION HISTORY SHEET 7

1 Scope

1.1 The present Quality Policy (hereinafter referred to as –the Policy) determines the strategic directions of JSC “VO “Safety” activity (hereinafter referred to as the Company) in the area of quality management.

1.2 The Policy is the document of the integrated management system (hereinafter referred to as the –IMS); it applies to the activities of the structural units, branches and officials in the framework of the effective IMS.

1.3 The Policy was developed taking into account the requirements of GOST standards ISO series 9000, standards ISO series 9000, and IAEA recommendations.

1.4 The Company's Director General shall bear responsibility for arranging development and approval of the present Policy at the Board of Directors of JSC “VO “Safety”.

1.5 The Policy shall be subject to revision, updating and improvement should there be any changes in the Company's development priorities and business environment. The Quality Division of the Company's Quality Management Department shall bear responsibility for execution, retention, and revision of the Policy.

2 Quality Policy

Joint Stock Company "VO "Safety" (hereinafter referred to as Company) carries out activities related to scientific and technical support of the state safety regulation in atomic energy use, activities for development and improvement of the legal and regulatory framework in the field of atomic energy use, industrial safety and other activities aimed at improvement of the state safety regulation in atomic energy use, and the conduct of expert review in industrial safety.

The senior management of the Company defines the following strategic objectives:

- A top priority objective is to ensure safety of nuclear facilities (hereinafter referred to as– NF) and hazardous industrial facilities (hereinafter referred to as– HIF), as well as nuclear, radiation, engineering, industrial, fire, environmental and occupational safety in implementing statutory activities;

- performance of works, providing services of high quality compliant with the Customer requirements and expectations, regulatory requirements of standards, rules, and regulations in the field of atomic energy use and industrial safety with absolute fulfillment of personnel safe labour conditions and minimal impact on the environment;

- compliance of the company's scientific and technical level with the long-term needs of engineering and professional support of activities carried out by the state supervisory (oversight) body;

- ensuring fulfillment of international obligations related to providing assistance in development of safety regulation infrastructure in the field of atomic energy use in the states importing nuclear power technologies;

- maintaining and improving the necessary competencies in engineering and consulting activities to expand the presence at the market of services in the field of industrial safety.

The Company's management strives to reach the established objectives by resolution of the following tasks:

- continuous improvement and enhancement of effectiveness of the quality management system based on the regular analysis of delivered services quality on the basis of data provided by the Customer and information related to internal and external factors of the Company's activity context;

- strict allocation of responsibilities and authorities of personnel by improvement of the Company's organizational structure;

- enhancement of employees' qualification and competencies by means of training in specialized organizations, participation in international workshops, conferences, as well due to spreading of the internal corporate knowledge;

- increase of personal interest of employees in safe and efficient work by material and moral encouragement, as well as shaping personnel commitments to basic principles of safety culture;

- providing for actions aimed at minimization of risks affecting the achievement of the Company's strategic objectives.

To achieve the established objectives the Company's management undertakes the following obligations:

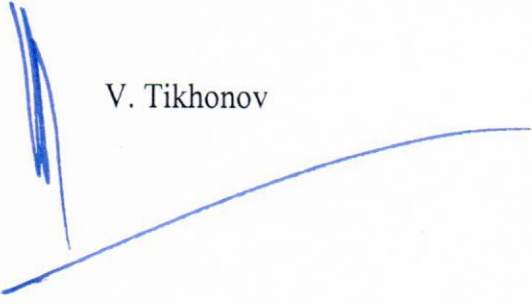

- to communicate the adopted Policy to all employees of the Company and consistently implement it in the practical activities, establish the necessary authorities and responsibilities for implementation thereof;

- to provide the quality management system functioning with necessary resources including human resources, finances, information, equipment;

- to analyze and enhance effectiveness of the existing quality management system including implementation of the necessary corrective and preventive actions, introduce and develop best practices in the field of quality.

The senior management urges all employees to continuously improve the quality of their work and to take an active role in implementation of this Policy.

Director General

V. Tikhonov
